Technologies/Frameworks: Linux, Git, Postman, MERN Stack

EDUCATION

REVA University

B.Tech. (Major) in Electronics and Computer Engineering

Oct. 2023 – Present

Bangalore, Karnataka

Indian Institute of Technology, Guwahati

B.Tech. (Minors) in Data Science

March 2025 – Present

Guwahati, Assam

RELEVANT COURSEWORK

- OOPS & Data Structures in C++
- Python Programming
- Database Management
- Design & Analysis of Algorithms
- Verilog HDL Programming

EXPERIENCE

DevBraze

Technical Team Member

March 2024 – Present

Bangalore, Karnataka

- Spearheading the Technical Team in all the core technical responsibilities of DevBraze, a student-run society of ECE.
- Tasked with the design and development of the official website for the club.
- Directly involved in the organizing and hosting of 2+ major hackathons at my University.
- Delivered Technical talks and Hand-on Workshops to fellow students on various emerging tools and technologies.

PROJECTS

Crisis Solver | React.js, Node.js, TypeScript, Sui

Dec. 2024

- Co-developed a Disaster Management & Relief web-app, as part of Unfold 24 Hackathon project, leveraging AI and Sui Blockchain Technology.
- The app bridges between donors and relief teams, ensuring efficient and accountable donation handling.
- Implemented real-time crisis prediction with Gemini AI and Sui crypto transactions through Sui Wallet.
- Worked on real-time transaction tracking and verification, so that flow of Sui donations is transparently monitored.

Hire Ease | Go, GoFr, React.js, FireBase API

Nov. 2024

- Co-developed as a hackathon project, designed to facilitate On-Campus Hiring Process, with separate UI for both candidates and recruiters.
- Worked with Firebase API for phone authentication via OTP during the user sign-up process.
- Assisted in the implementation of Gemini AI for creating local ATS Parsing system for automated resume shortlisting and recommending job openings based on profile.
